QIATA

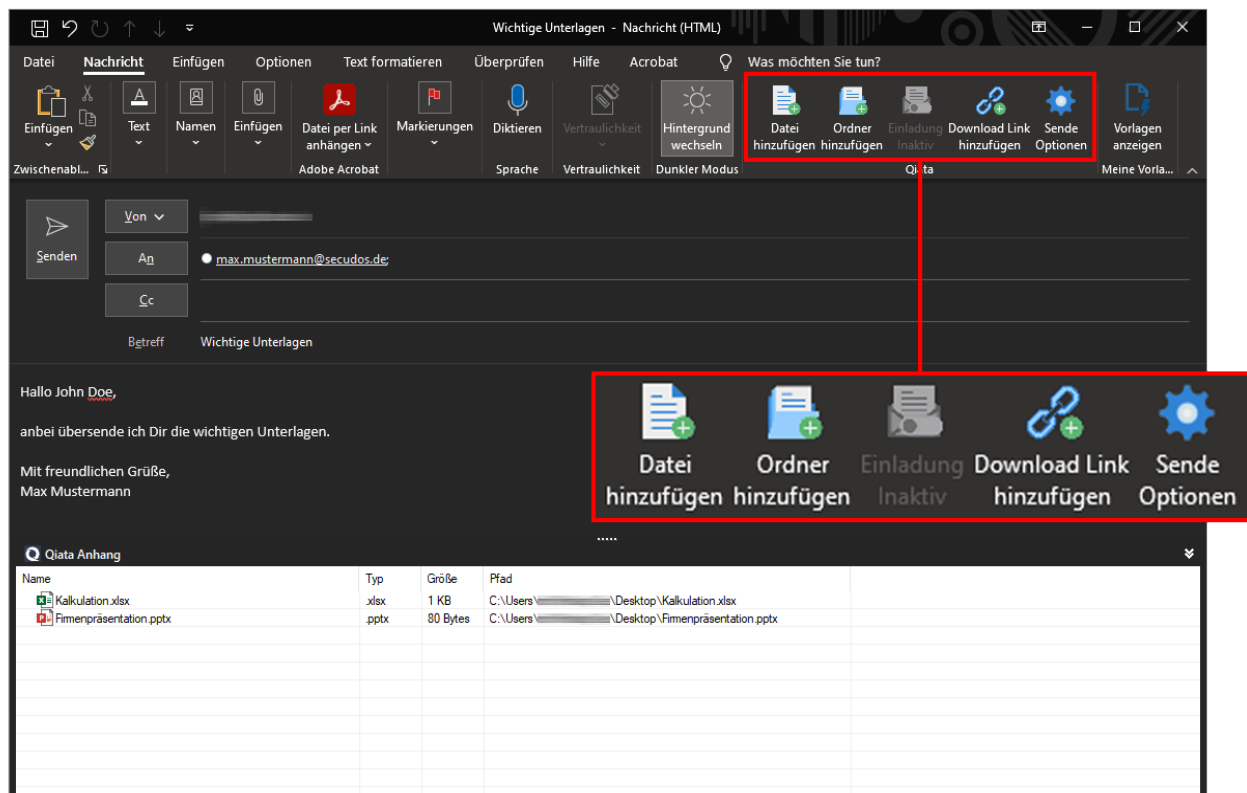

Outlook Plug-In

# The Qiata Outlook Plug-In

Send invitations and files safely directly from Outlook.

You will not change your habits for a safe and encrypted way to protect your sensitive data? Be sure, there is no need to do this. Keep on handling your mail program as usual. Qiata offers an Outlook Plug-In that allows users to easily send files, folders or invitations directly from within Outlook. You yourself can choose whether your recipient receives the files including your company CI, or whether the file(s) are simply embedded as a link in a mail.

Write your e-mail as usual and select the desired files and/or folders. The File Transfer will be generated automatically and encrypted. Sender as well as the Recipient will no longer have to take care of it and to make it perfect for the user he will receive a detailed mail notification about the transfer.

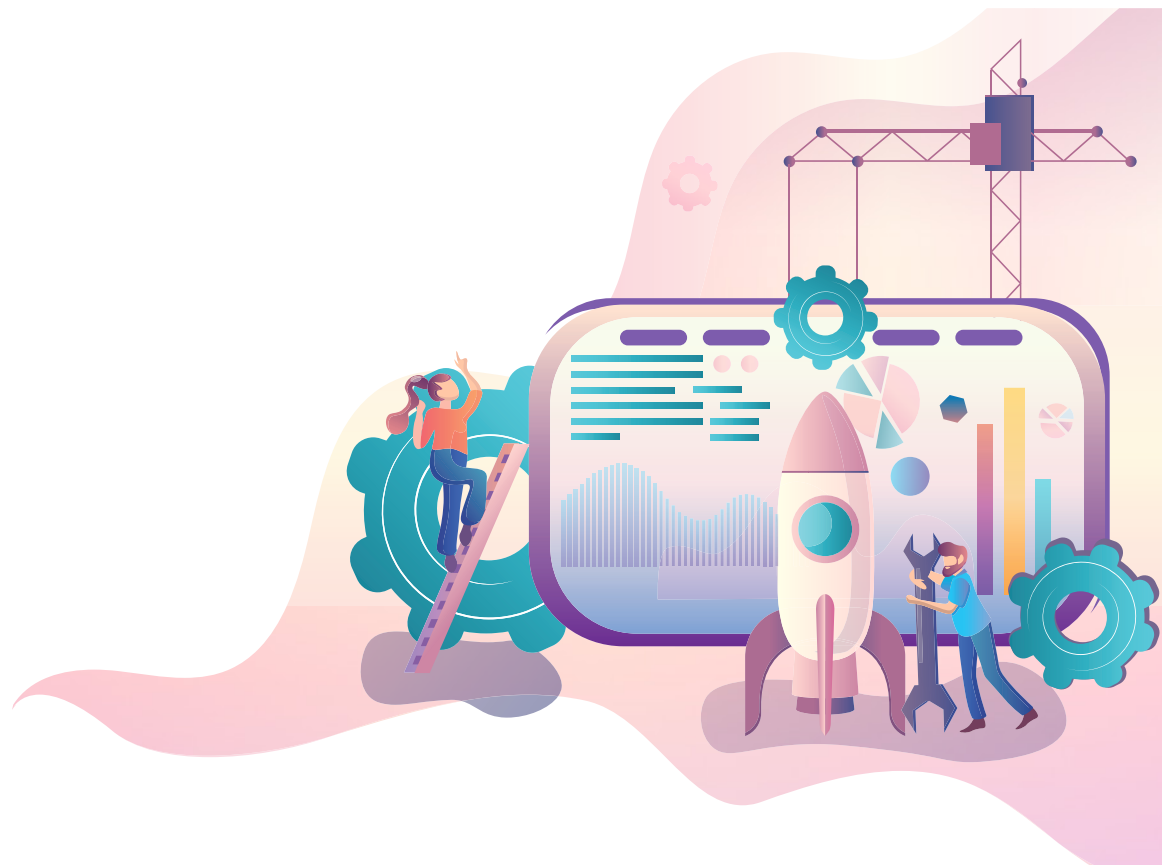

# Further features of the Plug-In

Qiata can now be easily operated directly from Outlook.

In addition the Plug-In enable you to set an expiration date for your File Transfer, if you like. You can also determine how often a recipient shall download a file. Furthermore, you can secure each transfer individually with password and/or PIN. Thus, the security is always guaranteed!

The user keeps on working as usual with the Plug-In but benefits from the user-friendly further options.

Qiata Outlook Plug-In is released for Windows 7 Professional, Windows 8 Professional, Windows 8.1 Professional and Windows 10, with the respective Outlook Versions 2010 Professional, 2013 Professional, 2016 Professional & 2019 Professional. Qiata customers can download this new Plug-In for free! Go to [www.secudos.com](http://www.secudos.com) to download the latest version. Per Active Directory the Plug-in may be installed on any desired computer within the network.
