# Handling with Data in Motion

Qiata supports you to share any files in your enterprise, easy, secure and traceable.

## Focus on the Managing Director

There are a lot of different confidential documents in your company like contracts, offers, invoices, orders, certificates, technical data sheets, financial reports, legal documents and many more. All these documents are stored in your company rooms safely. But, what will happen when sending them to any Third Party? Big files - Big efforts and challenges to send securely. What about data protection and confidentiality? You will/should not send any personal, confidential or sensitive files just by email. Anyway, according since law of GDPR you are not allowed to send it by email any longer.

## Qiata has the solution to meet these requirements:

### EASY

No matter whether you want to send small sensitive files or entire folder structures - you stay in your usual working environment. Use Qiata via the Outlook plug-in or the Desktop Client - SDC. You only need the recipient's email address. Qiata can even be connected directly to existing systems (e.g. the mail server).

### SECURE

Every connection to your Qiata is automatically encrypted, even for the recipient and without requiring anything special. No software - no hardware.

### COMPREHENSIBLE

All activities on your Qiata are logged in the audit log and can be viewed by authorized persons at any time thanks to the comprehensive role concept. In addition, the sender can be notified as soon as the recipient has downloaded his file.

# Qiata at a glance

Qiata offers even many more advantages than only standard features like file transfer or file receipt

## Cost Reduction

Save material costs / postal charges, for example for contracts or invoices.

Follow up terms of payment of your clients due to the recipient's download of the requested document. You can trace it and you will know at which time the recipient has downloaded the file.

## Teamwork

Let teamwork between your customers and employees become a playful game. Create virtual play-rooms where they can successfully and securely work together as one team on any project.

## Design

Point out to your customers that you take the topics of data privacy and compliance very seriously. Design Qiata according to your Corporate Identity (CI) with logo, colors etc. thus establishing trust among your business partners.

## Relief

Relief your email server in handling with files and relief administrative work from handling with big files. Transfer invitations in order to receive files in a safely manner (for instance received applications and/or big files).

## Encryption

With the File Encryption module, the files on your Qiata are dismembered and stored with high encryption. The files are not even readable with physical access. Not even for your administrator.

# More features of Qiata

Qiata presents more advantages for your everyday business

## **Compliance & GDPR**

Create rules to prevent that files will be sent to wrong recipients. You shall make your mind up „Who, what and from where“ files will be sent. Exclude your competitors whilst you strictly follow the law of GDPR.

## **Authorization Process**

Keep control and make your own decision which file will leave your company. Be informed „Before“ your employee will send any file. You can permit or deny files which are subject to authorization.

## **Attractive License**

Use Qiata with all your employees. Independently from license, Qiata is not user-based licensed but offers an attractive license model.

## **Autarkic Use**

Operate Qiata in your own network. Security Made in Germany - No backdoors and maintenance access. You are the operator and decision maker. Retain autarkic control of who has received your files respectively who should receive them.

## **Access Levels and Roles**

It is not a job just for anybody. Clearly determine who can and who cannot do anything on Qiata. Administrator or Auditor.

# Qiata File Transfer

In 6 easy steps to secure file transfer

## OPEN THE INTERFACE

User opens Outlook, Qiata Client (SDC) or Qiata interface via the browser.

1

2

## CHOOSE RECIPIENT

For sending, the user enters the recipient's email address, a subject and his text and attaches the file.

## STORE ON QIATA

Qiata stores the file on your own system and adds a link / download button to the email. The recipient will be created automatically.

3

4

## TRANSFER VIA MAIL-SERVER

Email (without attachment) will be transferred to the recipient via your email server to the recipient

## SECURE DOWNLOAD

Recipient clicks on the link / download button in the email, is connected to your Qiata encrypted, your CI is visible (logos, colors etc.) and can download the file.

5

6

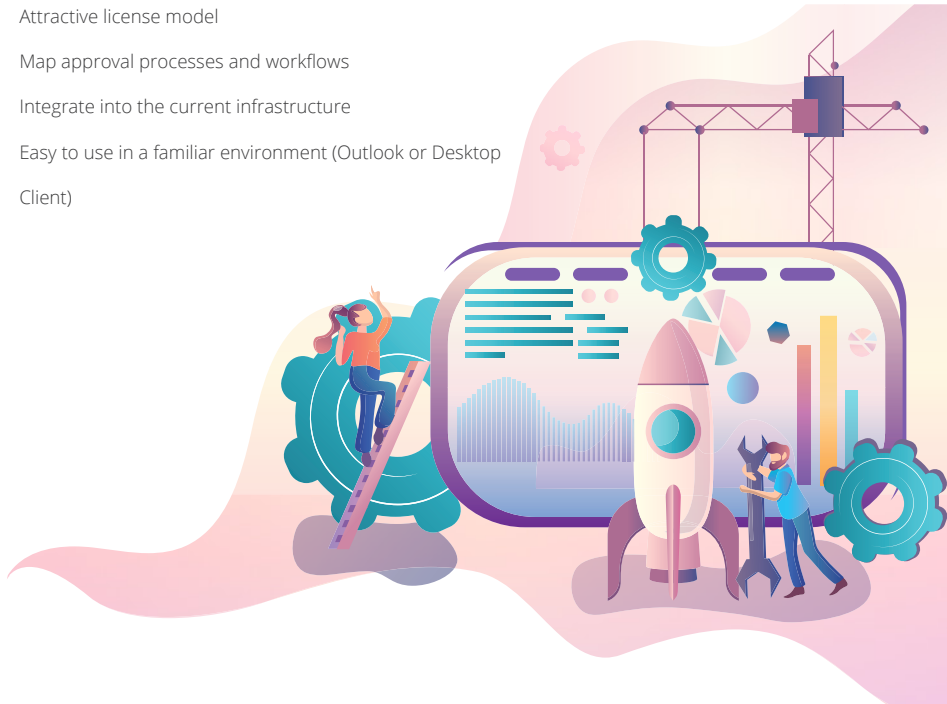

## SENDER INFORMATION

The sender / your employee will be informed of the successful download.
